THE FACTS: PFF CARE CENTER NETWORK

Since 2000, the Pulmonary Fibrosis Foundation (PFF) has been committed to improving the quality of care for individuals with pulmonary fibrosis (PF). We have established valuable collaborations bringing together healthcare providers, researchers, and the PF community in order to advance the understanding of pulmonary fibrosis and to enhance the care of patients. To accelerate the attainment of these related endeavors, the PFF has created a “first-of-its-kind” PFF Care Center Network (CCN) that will provide a unique infrastructure to expand patient care and increase research initiatives.

PFF CARE CENTER NETWORK

Announced in 2013, the PFF Care Center Network is comprised of an expanding group of medical centers that provide the expertise, specialized staff, and necessary resources for PF patients to fully manage their disease. PFF Care Center Network sites have experience and expertise in treating patients with fibrotic lung diseases and are dedicated to improving the lives of those living with PF.

CCN sites embrace a multidisciplinary approach that delivers comprehensive patient care. Experts in pulmonary medicine, rheumatology, radiology and pathology, all of whom have an expertise in interstitial lung disease, comprise the care team at each CCN site. As a result of this multidisciplinary team approach, patients benefit from receiving an accurate diagnosis, obtaining recommendations for continuing care, gaining assistance in acquiring essential social services, and having the opportunity to participate in collaborative research.

CCN sites will work with the PFF to actively engage their local PF communities in order to enrich the patients' quality of life, conduct educational events, and facilitate research initiatives. The sites will also be involved with other PFF Signature Programs, offering resources for support groups so that patients and caregivers can connect with and learn from others impacted by the disease.

Ultimately, people who receive care at a PFF Care Center Network site are working with some of the best PF specialists in the country.

Currently, there are 40 CCN sites within the United States (see map on the next page), with new sites being accepted as additional funding allows. For the latest list of sites in the PFF Care Center Network, visit pulmonaryfibrosis.org.

“As the leading advocate for the pulmonary fibrosis community, we are dedicated to advancing the care of people living with this deadly disease, and this starts with providing greater access to experienced care teams.”

- Gregory P. Cosgrove, M.D.
Chief Medical Officer of the PFF

ABOUT THE PULMONARY FIBROSIS FOUNDATION

The Pulmonary Fibrosis Foundation mobilizes people and resources to provide access to high quality care and leads research for a cure so people with pulmonary fibrosis will live longer, healthier lives. The PFF collaborates with physicians, organizations, patients, and caregivers worldwide. The Pulmonary Fibrosis Foundation has a four-star rating from Charity Navigator and is a Better Business Bureau accredited charity. The *PFF Summit 2017*, its fourth biennial international health care conference, will be held November 9-11, 2017 in Nashville, Tennessee. For more information, visit pulmonaryfibrosis.org or call 844.TalkPFF (844.825.5733) or +1 312.587.9272 from outside of the US.
