

PFF Care Center Network™
Care. Education. Innovation.

PFF CARE CENTER NETWORK

The Pulmonary Fibrosis Foundation (PFF) is dedicated to promoting earlier recognition and diagnosis of pulmonary fibrosis and ensuring that patients receive the highest quality healthcare. As part of that commitment, the Foundation worked with the PF medical community to establish the PFF Care Center Network in 2013, where people with PF can find experienced medical professionals who understand their disease and support services to improve the quality of their lives.

Thanks to ongoing efforts and collaboration of the PFF and the PF healthcare community, the PFF Care Center Network (CCN) has grown since 2013 to include both Care Centers and Clinical Associates. All members of the CCN have expertise in treating adult patients with fibrotic lung diseases. Patients living with PF can find experienced medical professionals who understand their disease and support services to improve the quality of their lives. Clinical Associate members are community-based institutions that partner with Care Centers in order to share resources they may not otherwise have access to. Clinical Associates join the CCN with the goal to grow into a Care Center member or to remain a Clinical Associate indefinitely. Through the CCN, Care Centers and Clinical Associates collaborate to promote and provide quality care to those living with PF.

The PFF Care Center Network (CCN) currently includes 86 individual centers across the country (see reverse,) 80 Care Centers and six Clinical Associates. The Network provides an opportunity for these expert care teams to work together to improve the quality of care for patients, collaborate in research projects to expedite and broaden scientific discoveries, and work with the PF community to increase the awareness and understanding of the disease. The PFF periodically accepts applications for additional members.. The PFF is proud to partner with these outstanding care teams. We could not accomplish all that we do without their efforts, expertise, and dedication to caring for those living with pulmonary fibrosis. To learn more about the PFF Care Center Network, visit <http://bit.ly/pffccn>. Please email ccn@pulmonaryfibrosis.org with any inquiries.

PFF CARE CENTER NETWORK

PFF Care Centers broaden our impact by collaborating with the community to:

- Identify patients with PF earlier
- Provide access to specialized care and cutting-edge research
- Enhance awareness and understanding of PF

PFF CARE CENTER NETWORK GOALS

- Diagnosis: Reduce time to accurate diagnosis of PF
- Quality of Care: Ensure patients have access to high-quality care within two hours of their homes through the expansion of the CCN and their partners within the community
- Research: Facilitate research within the CCN and PFF lead research to enhance our understanding of PF and expedite efficient clinical trials to identify effective therapies
- Advocacy: Effectively advocate for the PF community
